

The Dementia & Alzheimer's Dynamic Saturation Project (The DADS Project)

This presentation has been prepared for those who would like to participate in The DADS Project.

“What if there was a cure for Alzheimer's that nobody knew?”

“What if there was a cure in the Bible that nobody knew?”

The DADS Project has three primary goals:

1. Prevention

2. Reversal

3. Cure

The Seriousness of This Issue

- 5.2 million people in the USA have AD; 30 million people worldwide.
- 16 million predicted by 2050; 100 million worldwide.
- Another person develops AD every 67 seconds.
- 1 in 8 older Americans have AD.
- More than 200,000 under the age of 65 have early onset AD. As people live beyond the age of 65, their chance of having AD doubles every 5 years.
- Nearly 50% of people who live beyond the age of 85 will suffer from Alzheimer's.
- While deaths from stroke, heart attack, and various forms of cancer seem to be declining, deaths from Alzheimer's are increasing.
- One of the greatest health fears among women today is breast cancer. However, what many women do not realize, women in their 60s are almost twice as likely to develop Alzheimer's disease during the rest of their lives as they are to developing breast cancer.

The Three Phases of the Project

1. **Evaluation:** A memory evaluation of the group assembled.
2. **Saturation:** One hundred days of guided saturation of the Word.
Joshua 1:8; Psalm 119:105; Ephesians 4:23;
Romans 12:1-2; Psalm 1:1-3

Updates and Q & A time
3. **Reevaluation:** A second visit and reevaluation of the group at the end of the one hundred days.

Compilation of the data

Who should be involved? Any adult with or without present memory loss

You do not have to be a member of the church at the workshop location

The Costs: Virtually \$0.00
